FARVIEW HAS GAINED FIVE FEET
Big Stream Flowing in From Meadow Brook Where Much Water is Ponded—Situation Greatly Improved But Sufficient Supply Has Not Been Obtained.

The plumbers have not quite finished with the work on the new line of water pipe to start the first pump in a day or two if necessary. On the electric line the pair of wires for the first pump has been put up to connect with the line on West Main street. The second pump, which will have to be brought in as far as the blacksmith shop, is not all up yet, but will be soon.

Collapsing Rates.
The first of the water rates for the past quarter were paid on Tuesday and Cashier Raymond has also to deal with many of the Italian employees on the new pipe line. This made it one of the worst days he has experienced in the office. The rates have been remonstrated in regard to the rates from those who have not had water for some time, but only about ten or twelve complaints at all, and in not all those instances were rebates asked. The bills were not out for the usual amount for the quarter.

At the Pumping Station.
At the pumping station on Tuesday the carpenters and electricians were busy putting on the finishing touches. The steam fitters have some connections still to install and did not work from a full pond. When the driving belt and the discharge pipe the first pump is ready for operation. A pressure gauge has been installed in the pump house. It is set at 125 pounds and will show the pressure on the line at all times.

Farview reservoir has been augmented by the rainfall, but it is estimated that it is still 425,000 gallons short of a full pond. A representative of W. & B. Douglas was in Norwich Tuesday, inspecting the installation. He was very favorable in his report, saying that the city was capable of delivering one million gallons of water in twenty-four hours against a head of 250 feet. This would require a greater pressure on the pipes than at 244 1/2 feet, which is the head to be overcome when Farview reservoir is full.

Can Start When Wanted.

Engineer Stephenson at the pumping station on Tuesday said that while

Mr. George gave his cornet solos in sweet, clear tones, making the instrument sing the words as he gave the air. The old familiar songs were especially appreciated by the audience.

Ice Caused Boat to Sink.

Launch "Carol" used between New London and Allyn's Point, was sunk Saturday night at Palmer's wharf, at Montville. The boat was on its way to New London after dark when a cake of heavy ice was hit, springing a leak in the slender boat. The man with the boat pulled from her position to Palmer's wharf, where he hoped to be able to run her ashore before she sank. Owing to shore ice, however, he failed, but was able to tie her up to the north corner of the wharf before she went down.

The boat was pulled from her position Sunday by the launch Thames from the Riverside shipyard and towed to the yard for repairs.
